

VISITOR RESTRICTION GUIDELINES

Women's Services

As the situation related to the spread of COVID-19 continues to change, Inova Health System is committed to providing the best possible birth experience for our patients while keeping team members, patients and the broader community safe. Beginning June 29th 2020, Inova will implement the following visitor policy for the Women's areas.

- Support person has 24/7 visitation on Postpartum and L&D; must be the same person
- Visitation is limited to one support person for duration of hospitalization.
- No children, including siblings are allowed to visit the hospital.
- Doulas will be permitted during the delivery phase of hospitalization, in addition to the support person, if the patient is COVID-19 negative.

During antenatal testing, only patients will be allowed to enter the exam room. The accompanying support person should remain in his car/outside the hospital. The doctor will call the support person to confer any necessary information.

For High Risk Perinatal patients, children visitation will be on a case by case basis.

Thank you for your support in maintaining our mission to provide world-class healthcare – every time, every touch – to each person in every community we have the privilege to serve.
