

VISITOR RESTRICTION GUIDELINES

Women's Services

Updated 2.26.21

As the situation related to the spread of COVID-19 continues to change, Inova Health System is committed to providing the best possible birth experience for our patients while keeping team members, patients and the broader community safe.

Inova has implemented the following visitor policy for the Women's areas.

Childbirth Locations

- Support person has 24/7 visitation on High Risk Perinatal unit, LDR and Postpartum; ***must be the same person***
- Visitation is limited to one support person for duration of hospitalization.
- No children, including siblings are allowed to visit the hospital.
- Doulas will be permitted during the delivery phase of hospitalization, in addition to the support person, if the patient is COVID-19 negative.

For High Risk Perinatal patients, children's visitation will be on a case by case basis.

Antenatal Testing

In order to be compliant with CDC recommendations and to keep you and our staff safe we are limiting the number of support people that enter the Antenatal Testing Center. Those who are having a Level 2 Ultrasound (anatomy scan) can have their support person accompany them. In some circumstances, the ATC physician may request a support person attend.

Thank you for your support in maintaining our mission to provide world-class healthcare- every time, every touch- to each person in every community we have the privilege to serve.
