

Emergency Medicine Physician ICD-10 Self Learning

Follow these four steps to complete the ICD-10 self-learning:

1. Complete the four-part course on HealthStream

Log into [HealthStream](#) and click on the “Catalog” tab. Search for **ICD-10 Training for Emergency Medicine Providers**. This four-part course is approved for 1.5 AMA PRA Category 1 Credits.

Description: This course walks physicians through how to document diagnoses commonly seen by Emergency Medicine physicians. The course also covers concepts that are new or important to ICD-10, such as encounter types and mechanism of injury documentation, and links between conditions and their underlying causes needed to support medical necessity.

2. Review the following Epic tip sheets:

[Epic ICD-10 Tip Sheet: Document Mechanism of Injury in a Note](#)

[EnRol Search for Diagnoses](#)

3. Review the 3M Specialty Documentation Reference Card for Emergency Medicine

Review the 3M Specialty Documentation Reference Card for Emergency Medicine at Inova’s Physician Documentation site at the link below. **Note: This 3M proprietary content is password protected. Enter the following:**

User Name: Inovadoc

Password: ICD10

<http://www.inova.org/for-physicians/physician-documentation/ICD-10/specialty-reference-cards>

4. Review the American College of Emergency Physicians (ACEP) ICD-10 references

located on Inova’s [Physician Documentation](#) page or click each link below:
