New EPIC Process for Malnutrition

RD assessment entered in Nutrition Note in EPIC. If criteria met, RD fills out additional Malnutrition Assessment which will generate a cosign to attending MD.

Co-sign request goes to EPIC physician inbox.

Physician signature alert pop up is visible by clinicians when opening charts.

Physician co-signs and pop up alert disappears. Physician has ability to bypass prompt.

If disagreement, please document in progress notes as you would any physician extender note. Must co-sign anyway. Unsigned notes become chart deficiency.

Malnutrition will be accurately diagnosed & coded to reflect patient SOI/ROM.
