Caring is preparing
ALL HAZARDS PREPAREDNESS PACKET

INOVa HEALTH SYSTEM
Taking Care of Your Children

Planning on who will take care of your children is the most important thing you can do to prepare your family for a disaster situation. Talk with your family, friends and neighbors and see who will be able to take care of your child(ren) in the event that you are needed to report to work. This includes picking your child(ren) up from school or daycare. If you will need someone other than your immediate family member to take care of your child, here are some questions to ask yourself:

- Does your child’s school/daycare have all your current contact phone numbers?
- Does your child’s school/daycare have a current list of your emergency contacts?
- Do your child’s emergency contacts know where your child’s school/daycare is located?
- How will you communicate to your emergency contacts that they may need to care for your child? Do you have all of their current contact phone numbers?

Included in this packet is an “Emergency Contact and Information Sheet” you can complete and share with your family, friends, neighbors and co-workers who may wish to assist you in an emergency. You may also want to check the emergency policies of your child’s school or daycare. Some schools may already have plans to take care of the children at their facilities during a disaster situation.

You should also prepare an emergency supply kit for your child to take to the child care center including:

- diapers and wipes – if appropriate
- extra change of clothes (socks and underwear)
- copy of the Emergency Child Care Request form
- comfort item (small stuffed animal)
- formula, breastmilk and bottles if
- any prescription medications your child may be taking
- dry foods (crackers, etc.)

Pet Care

Emergency planning should include pet care. If possible, make prior arrangements for someone to board the animal or for someone to check on its well-being during your absence. Many shelters, including the American Red Cross, cannot accept pets.

Recommended items for a basic disaster pet kit include:

- airline approved carrier for each pet with ID, photo, vaccination records and special needs list
- sufficient medicines • a muzzle/leash • can opener • blankets • extra supply of pet food
- paper towels, trash bags and other waste disposal supplies • plenty of clean water • bowls

For more information, contact your local American Red Cross, Humane Society or the American Veterinarian Medical Association.
Disaster Supplies Kit

Planning for any emergency requires considering scenarios that could disrupt your daily life. Consequently, you should plan to have food, water and other essentials to get you through the emergency. The following is a list of the basic items that you might want to consider storing in your home. Remember to check your supplies and re-think your needs every year.

Water

- Store in plastic containers or purchase bottled water
- Plan for one gallon of water per person per day (3-5 day supply)
- Store in cool, dark place and label with the date
- Tap water generally may be stored for up to two weeks (Use 2-3 drops per gallon of standard household bleach to disinfect and store water in sterile containers.)

Food

- Keep a supply of 3-5 days’ worth of non-perishable food per person
- Store foods that require no refrigeration and little preparation or cooking
- Some suggestions include canned or boxed juices, soup, peanut butter, jelly, granola bars, canned meats, fruits and vegetables (can opener)

First Aid Kit

Consider including the following items in your home first aid kit:

- Sterile adhesive bandages in assorted sizes
- Gauze pads
- Hypoallergenic adhesive tape
- Scissors
- Tweezers
- Needle
- Moistened towelettes
- Antiseptic
- Thermometer
- Petroleum jelly or other lubricant
- Gel ice packs
- Safety pins
- Cleansing soap
- Latex gloves
- Sunscreen
- Cough syrup
- Anti-diarrhea medicine
- Laxatives
- Syrup of Ipecac
- Activated charcoal to counter poisoning
- Aspirin and non-aspirin pain medications
- Medicine dropper
Tools and Supplies

Keep the following items handy for all-around use:

- Extra batteries of assorted sizes
- Paper cups, plates and plastic utensils
- Flashlight
- Battery-operated radio
- Carbon monoxide and smoke detectors
- Cash and/or travelers’ checks
- Non-electric can opener and utility knife
- Small ABC fire extinguisher
- Waterproof matches
- Plastic storage containers
- Sewing supplies
- Signal flares
- Shut off wrench for house gas and water
- Toilet paper, moist towlettes, soap and liquid detergent
- Household chlorine bleach
- Duct tape
- Roll of plastic

Clothing and Bedding

Consider assembling one or two complete changes of clothing per person including:

- Sturdy shoes or workboots
- Raingear
- Blankets or sleeping bags
- Hats and gloves
- Thermal underwear

Car Kit

- Supply of non-perishable food
- Water (3-5 day supply)
- First Aid Supplies
- Flares
- Jumper Cables
- Seasonal Supplies (salt, sand, boots)
Personal Preparation Checklist

This checklist will help you and your family prepare for emergency situations that may arise when you are working:

Things to Arrange:
- Child care
- Elder care
- Pet care

Things to Do:
- Discuss emergency plans with your family (including evacuation plan)
- Complete and distribute Emergency Contact Information Sheet
- Complete Inova Emergency Child Care Center Request form
- Prepare a letter of authorization for providing medical care to children
- Stock Disaster Supplies Kit
- Pack Emergency Overnight Bag

Read and keep this All Hazards Emergency Preparedness Packet in a safe location.

Emergency Contact and Information Sheet

Please complete and share copies with families, friends, neighbors and co-workers who you may wish to assist you in case of an emergency.

**Widespread Flu or Avian Flu Outbreak Planning**

**Annual Flu Shots**
There are some things that you and your family can do to help prevent the spread of flu. It is important to get an annual flu (influenza) vaccine. A flu shot will not likely protect you from the Avian flu, but a flu shot can help to keep your immune system strong in case there is a widespread influenza outbreak.

If you are eligible to get a pneumonia vaccine, it’s a good idea to do so. This vaccine protects against bacterial pneumonia, which is a common complication from the flu.

**Wash Your Hands**
Washing your hands regularly is an important way to stop the spread of influenza. It’s an important thing to teach your children as well. Keeping an alcohol-based hand sanitizer at home, work and in the car will help you to keep your hands clean in between washing.

**Keep Supplies Handy**
If there is a widespread flu outbreak, it is likely that schools, offices and businesses will temporarily close. This could result in the disruption of mail service, transportation, phone service, access to banks and grocery stores. Because of this, it is a good idea to have some essential supplies and cash on hand. A two week supply of non-perishable food and water is a start.

If you or a family member has special health concerns, plan accordingly. Talk to your doctor to find out how you can get access to additional supplies of medicine. You should also keep an extra supply of any necessary medical supplies such as blood glucose and blood pressure monitoring equipment. Because you may not be able to see your regular physician during an emergency event, you should keep a record of your family’s medical history on hand. The forms on the next page will help you to organize this information.

**Have a Family Plan**
Create a back-up plan for child care in case schools are closed for an extended period of time. Find out if your child’s school has a flu outbreak operations plan. Have a family plan in place and make sure everyone knows where to meet in case you are separated during an emergency.

The forms on the following pages will help you collect important details about your family’s medical history and contact information in the event of an emergency. Make copies for each member of your family to keep.
